AlliedCrowds

AlliedCrowds

Introducing the first free directory of crowdfunding platforms across Asia. The data is based on the AlliedCrowds Capital Finder, a database of over 7,000 alternative finance capital providers across emerging markets. Our data has been used by organizations like [FSD Asia](#), [UNDP](#), [World Green Economy Organization](#), GIZ, World Bank, and others in order to provide unique, actionable insights into the world of emerging market alternative finance. This is the latest of our regular reports on alternative finance in emerging markets; you can [find all previous reports here](#).

Crowdfunding rose in prominence in the post-financial crisis years (starting in 2012), and for good reason: a global credit crunch limited the amount of funding available to entrepreneurs and small businesses. Since then, crowdfunding has grown rapidly around the world.

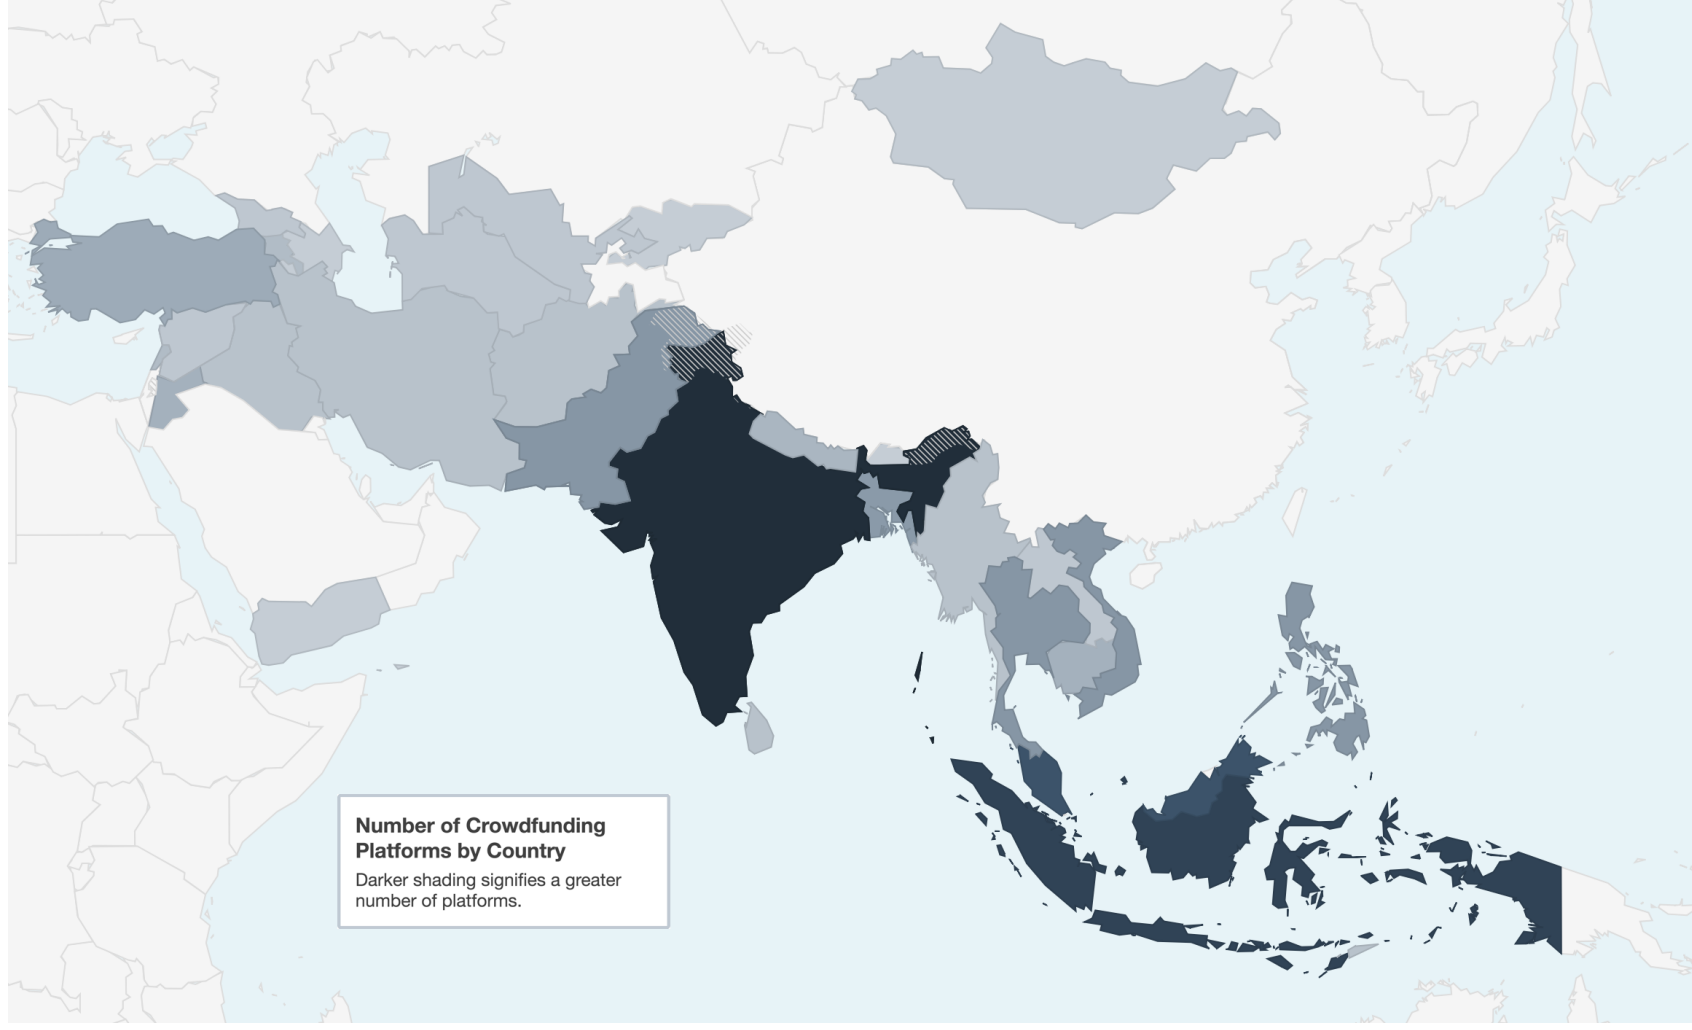

Crowdfunding is especially consequential in countries where SMEs find it difficult to raise capital to start or grow their businesses. This is the case in many Asian countries; according to the [SME Finance Forum](#), there is a \$2.3 trillion MSME credit gap in East Asia and the Pacific. Crowdfunding can help to fill this gap by offering individuals and small businesses an alternative source of capital. This can come in the form of donation-based as well as lending-based (peer-to-peer or peer-to-business) crowdfunding.

In order to help entrepreneurs and small business owners to find the crowdfunding platform that's right for them, we are releasing the first publicly available list of all crowdfunding platforms across Asia.

The report is split into two key sections: the first one is an overview of crowdfunding platforms, and how active they are across the largest markets on the continent. Each investor in the overview section has a more in-depth profile, listed below the overview. These profiles offer more actionable information about the platforms: where they are active, a brief description about them, their office locations, as well as other useful data points.

We believe information is a crucial missing piece of the alternative financial ecosystem across emerging markets, and we have compiled the [Capital Finder database](#) and this directory to attempt to remedy this gap.

Additionally, we've recently released the [SDG Capital Finder](#), the first searchable database for identifying funders that are aligned with the Sustainable Development Goals. This directory is intended to help students, researchers, journalists, analysts, government officials, startups, investors, and many others to get a better picture of crowdfunding activity across Asia. To find out more about our methodology, or to speak with us about how our data may be useful to your organization, please reach out to reports@alliedcrowds.com.

AlliedCrowds

The following table provides an 'at a glance' overview of the firms in our database, and shows how active they are in some of the biggest markets across Asia.

Chuffed

Founded in 2013

<https://chuffed.org>

So have you ever walked down a major pedestrian strip in the middle of a city and all of a sudden, there's this person smiling at you. Bright t-shirt. Clipboard in hand. Waving. For a moment you think you might be in one of those movies where the attractive European backpacker asks you for directions and after some awkward translational comedy, love ensues. No such luck – you know who it is. Your eyes meet, briefly. Damn it. Pull out the phone, or divert. It's one of those "charity" people trying to get you to sign up. For lots of us, that's the most frequent interaction we have with charities and the non-profit world... and let's be honest, it's crap. Even for those of us in the non-profit world (yep, that's us), we know the days of the charity muggers ('chuggers') are numbered. We know that dropping your money into a charity and never knowing or hearing where it goes are numbered. And we know that even though people are generous and they want to give, it's hard to know who's actually going to make a difference with your hard earned cash.

Comicola

Founded in 2014

<http://comicola.com>

Many years ago we were young cartoonists, built little buzz in the community. Now, in retrospect, we see ourselves as one of the few people of that generation still pursue the comic industry. We believe that, cartoonist profession deserve what's more they are receiving now. We believe that, if invested properly, the artist not only feed itself, but can live with this trade-off only! Therefore, we created Comicola, an online platform for comic artist community in Vietnam, where they can share innovative products. But, this is not the first platform toFrom praises. The ultimate aim of the work is taken up Comicola, it's been published, bringing books to the wider public, and to bring maximum benefit to the artist. We have one strong belief, although the reading comics online is booming and big threats to the publishing industry, but traditional comics still own place, there is 1 large loyal readers. We, with the experience ahead, we hope to contribute our best to help the young artists in Vietnam, thereby boosting Vietnam comics platform development.

Desired Wings

Founded in 2015

<https://www.desiredwings.com>

Desired wings is a tech enabled platform supporting aspirations, dreams and desires, creating an ecosystem that is willing to nominate and create crowdfunding projects. A crowdfunding platform where people would come forward to donate money to their favourite project in order to fulfil desires of an aspiring Indian in exchange for a unique reward, thereby getting a lot of people to contribute a small amount of money to make a living, a dream come true. We intend at becoming a model for mapping visionaries, aspirants, budding entrepreneurs and creative professionals to micro-investors and early adopters. Connecting multiple dots together, getting brands, running CSR programs, facilitating sponsorship opportunities will be the means by which a new economy will be healing the nation. We believe that crowd funding is a dynamic industry that is only at its infancy stage in India. It is a new catalyst in the ever evolving financial ecosystem and so is playing a vital role in driving the development of a whole new economy. We also entrust upon the breakdown of opportunities in the new crowdfunding ecosystem in order to look at it as a potential business model that will emerge in the process

Durise

Founded in 2014

<https://durise.com>

We at DURISE are made up of a professional real estate team, with a vast set of skills, experience, and a large network in the Middle East, specifically in Dubai. DURISE was an idea sketched on a napkin over dinner; with the goal of unifying and simplifying the real estate industry, first in Dubai, and soon, the rest of the Middle East. As with every productive idea, this one was born out of necessity. Real estate is undoubtedly one of the most guaranteed and valuable investments. Unfortunately, the majority of the population cannot afford, if at all, more than one home in their lifetime. Therefore, there is no room to use this tool as a method of growing and diversifying one's portfolio.

Launch Good

Founded in 2013

<https://www.launchgood.com>

LaunchGood was started as a community and ecosystem to revive that spirit of creativity and entrepreneurship that elevated Muslims globally for centuries. It is a place to support great ideas in the community and also challenge ourselves to think bigger. It is a network that insists the ummah is still alive in our hearts, that we are connected no matter where we are. It is our showroom to the world of all the great things Muslims are capable of. Could a Muslim write the next Harry Potter novel, create the next Lord of the Rings trilogy, or discover the next great vaccine? We firmly believe so, that's why we're here. We invite you to be part of our global community to launch great projects, both as a supporter and a project creator. Together, we can change our communities, our countries and the world - one project at a time!

MEEFUND

Founded in 2016

<https://www.meefund.com>

Wouldn't it be great if creators with great ideas and talent have a 'place' to tell their story, share their dreams and allow supporters to back their ideas to reality. MEEFUND.com is carefully crafted from the experiences of business and financial consultants who aim to see new phenomenon in Asia via reliable online crowdfunding platform. We love to see new ideas come to life! MEEFUND would bond the 'hands of the creators' to 'hands of the supporters' to blend those dreams to reality. Through the mechanism of crowdfunding, MEEFUND would shift creators' behaviors to be able to gauge the adoption of the crowd before gaining funding for their projects. Supporters would also be able to visualize what they support before anyone else and gain limited and personal rewards from creators. Professional consultants at MEEFUND could also help filter ideas and fill in business gaps to ensure creators success. So, if you have great ideas and dreams to create something. Start projects with MEEFUND

MEKAR Network, PT. Sampoerna Wirausaha Founded in 2010

<https://mekar.id>

Mekar adalah perusahaan pembiayaan inovatif yang membiayai usaha kecil yang berkembang di Indonesia. Mekar membiayai dengan cara yang cepat, sederhana, dan pribadi. Cepat karena kami memproses pengajuan permohonan kredit Anda lebih cepat dibanding yang Bank bisa lakukan. Sederhana karena kami mendatangi Anda, prosesnya tanpa dokumen kertas; dan Pribadi, karena agen Mekar membantu Anda dalam hal permohonan kredit Anda secara pribadi. Pada semester kedua tahun 2016, Mekar akan membuka platform penggalangan dana publik untuk para pemberi dana. Pemberi dana ini kemudian akan menjadi orang-orang yang memberikan pinjaman kepada usaha kami yang berkembang.

Milaap Founded in 2010

<https://milaap.org>

Milaap (Hindi word for 'unity') was initiated in June 2010, by three passionate young entrepreneurs who had a single vision – to change people's concept of giving and make it a personal, transparent and sustainable process. The end borrowers are the deserving, working poor of India – students, small businesses, families - who need a small amount of capital to get ahead and change their lives for the better.

Modalku Founded in 2015

<https://modalku.co.id>

Modalku is a new marketplace for peer-to-peer (P2P) lending to give Indonesia's small and medium enterprises (SMEs) greater access to funding by means of loans pooled from crowdfunding. Modalku offers companies quick access to non-collateral loans with interest rates between 15 and 20%. It also promises an annual return of up to 18% to individual lenders who take part in crowdfunding the SMEs through Modalku's online platform. Modalku offers loans from Rp 50 million to Rp 500 million (\$3,618-\$36,180) with a tenure of three, six and twelve months.

seedX

Founded in 2014

<https://seedx.in>

SeedX is an online ecosystem for early stage companies - from funding to service providers to consulting. Apart from raising funds through reaching out to investors on SeedX, startups can also avail of offline advisory (M&A/ JV advisory to specialised consulting assignments). While it may be argued that this has been done in many different ways and there are a number of accelerators & incubators in India, we believe SeedX is different for the following reasons: A) SeedX will alter the profile of the angel investor in India. Angel investing has traditionally been the preserve of a wealthy few. SeedX seeks to change this by creating a platform & environment for investors with surplus capital in the range of Rs.10-20 Lakhs to participate in the investment & value creation process across 2-3 early stage ventures. We believe this could be disruptive given the number of angel investors this will attract and could fundamentally alter the angel investment landscape. B) While existing accelerators and incubators are a valuable part of the ecosystem, they do not provide dedicated advisory to startups. Startups seek not just funds but many inputs and guidance as they grow, services not catered to by the bigger advisory firms. SeedX+ will be the umbrella of services provided by the platform that are contextualised to the need & environment of early stage ventures. These services will be delivered by the core team at SeedX in partnership with an empanelled list of advisors / consultants each of whom would bring specific skills and capabilities to the table.

SkolaFund

Founded in 2014

<https://skolafund.com>

Skolafund is web platform for students, especially the ones in need, to crowdfund their scholarships for higher education. Our mission is to make higher education affordable and accessible to those who qualify. We believe that no one should be deprived of quality education just because they cannot afford it. Skolafund first went online in April 2015 with an Alpha Website. The Alpha lasted till August 2015. Throughout this four months, our platform raised near RM 25,000 for 6 students, funded by 125 members of the community. Seeing the strong support and encouragement, we decided to enhance the website further, to make it more user-friendly, with an infrastructure that would be able to support more scholarship campaigns. Hence, this Beta version. We have a big vision. We aspire to be the biggest higher education financing platform in Asia by providing better alternatives for students to finance their higher education. Crowdfunding is just the first step for us. We have big plans. Moving forward, we aim to introduce more solutions for students to benefit from to fund their higher education. To make this happen, we hope to get your continuous support
