

# Cryptocurrency in Emerging Markets

July 2018

AlliedCrowds

# AlliedCrowds

*Introducing the first free directory of cryptocurrency exchanges across emerging markets. The data was collected using the same process as for the [Capital Finder](#), a database of over 7,000 alternative capital providers across emerging markets. Our data has been used by organizations like [FSD Africa](#), [UNDP](#), [World Green Economy Organization](#), [GIZ](#), [World Bank](#), and others in order to provide unique, actionable insights into the world of emerging market alternative finance. This is the latest of our regular reports on alternative finance in emerging markets; you can [find all previous reports here](#) (access to these reports is and will always be free, but requires an account).*

Cryptocurrencies are an exciting new medium of exchange that will have a transformative impact in emerging markets. Unique application for cryptos, range from remittances and online payments, to loans and smart contracts.

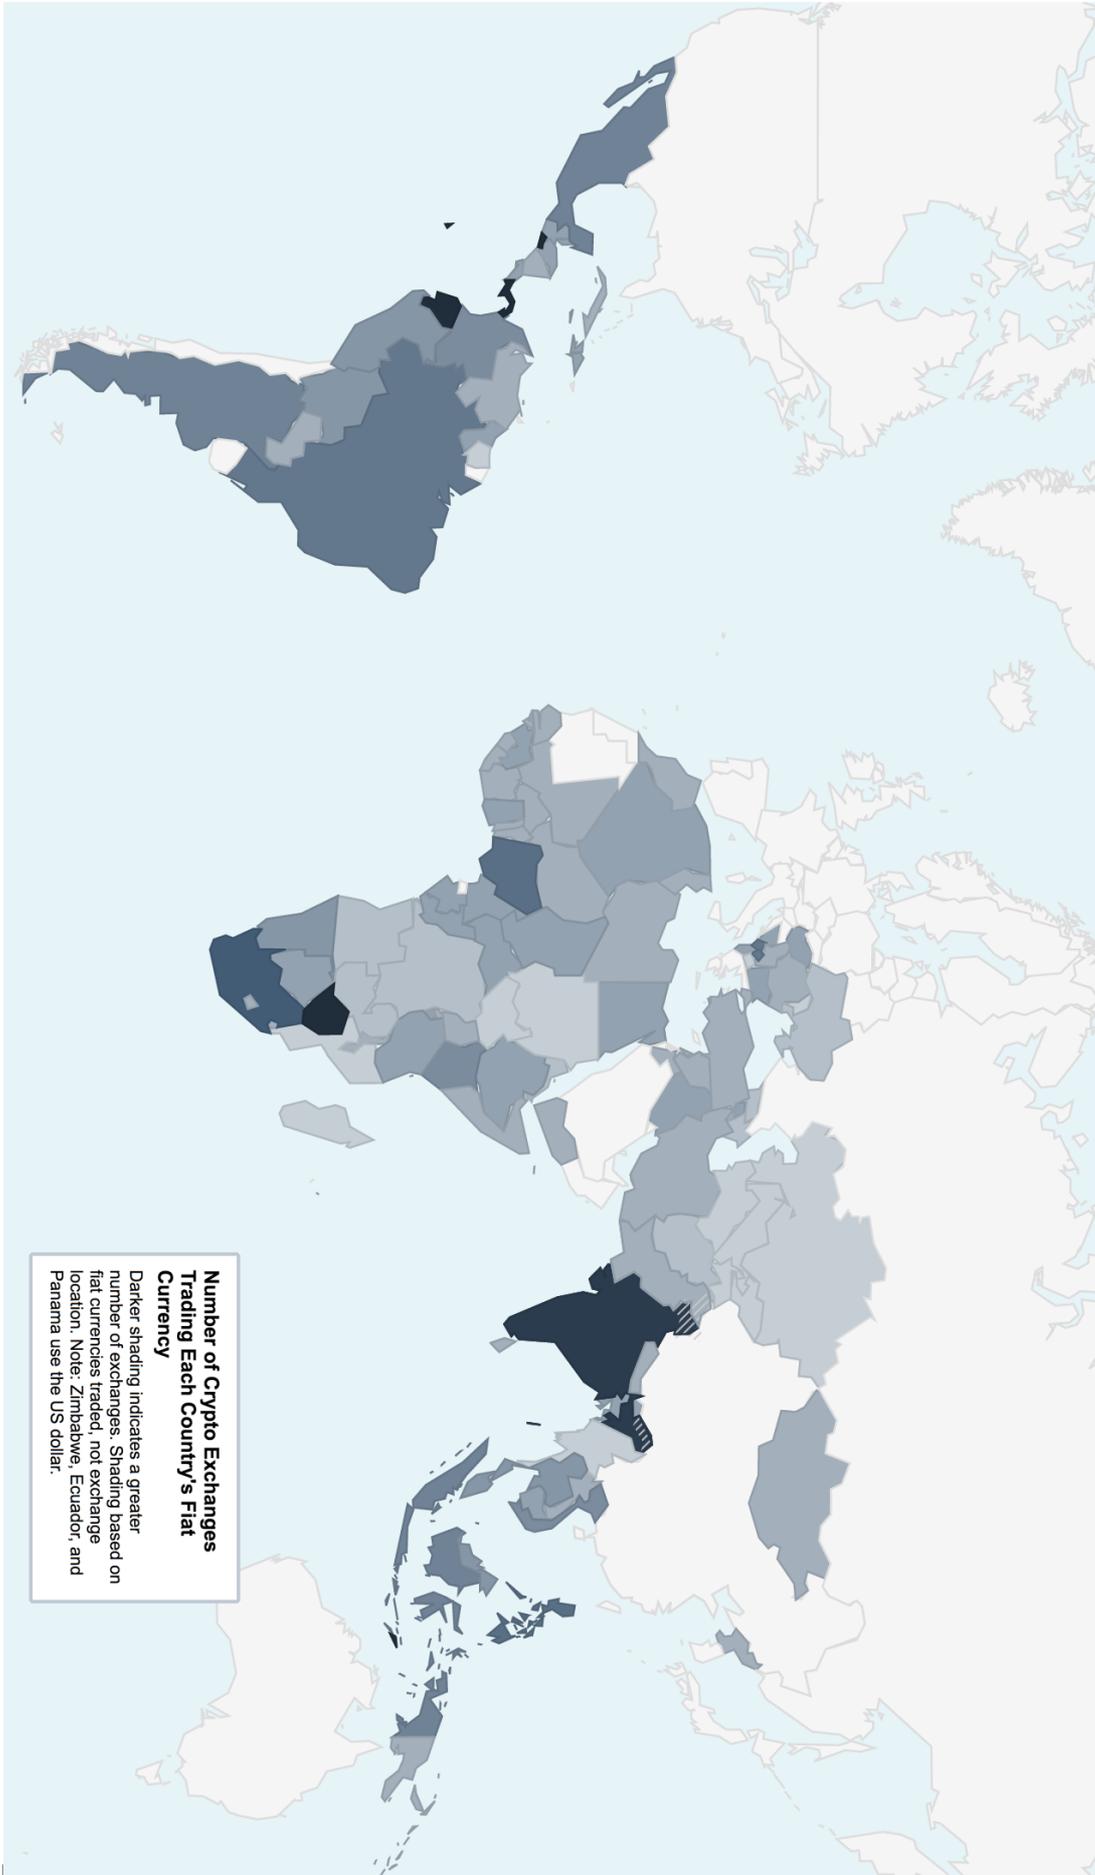

We have followed the blockchain and cryptocurrency space since the early days, and have developed products that give us unique insights into the space. This allows us to learn about exciting new developments that are taking place at cryptocurrency and blockchain companies, and stay current on the latest developments, particularly as it pertains to emerging markets opportunities.

This report provides an important foundation for understanding cryptocurrency in emerging markets. It establishes which cryptocurrency exchanges will trade which currency pairings. In other words, it answers the question where a member of the Nigerian diaspora (for example) can exchange his or her Bitcoin or Litecoin into naira, and vice versa. This enables him or her to do many things. For example, he or she will be able to channel money home in a more efficient way; alternatively, he can use a cryptocurrency to pay the salaries of employees or contractors.

This report will be useful not only to members of the diaspora, but also to development organizations who are looking to explore this space, entrepreneurs who are considering cryptocurrency solutions, crypto traders, fund managers looking into this space, researchers examining how cryptos can play a role in emerging markets, and many others.

Please visit our site if you'd like to find out more about our [products and services](#). Additionally, we've recently released the [SDG Capital Finder](#), the first searchable database for identifying funders that are aligned with the Sustainable Development Goals. To find out more about our methodology, or to speak with us about how our data may be useful to your organization, please reach out to [reports@alliedcrowds.com](mailto:reports@alliedcrowds.com).

# AlliedCrowds

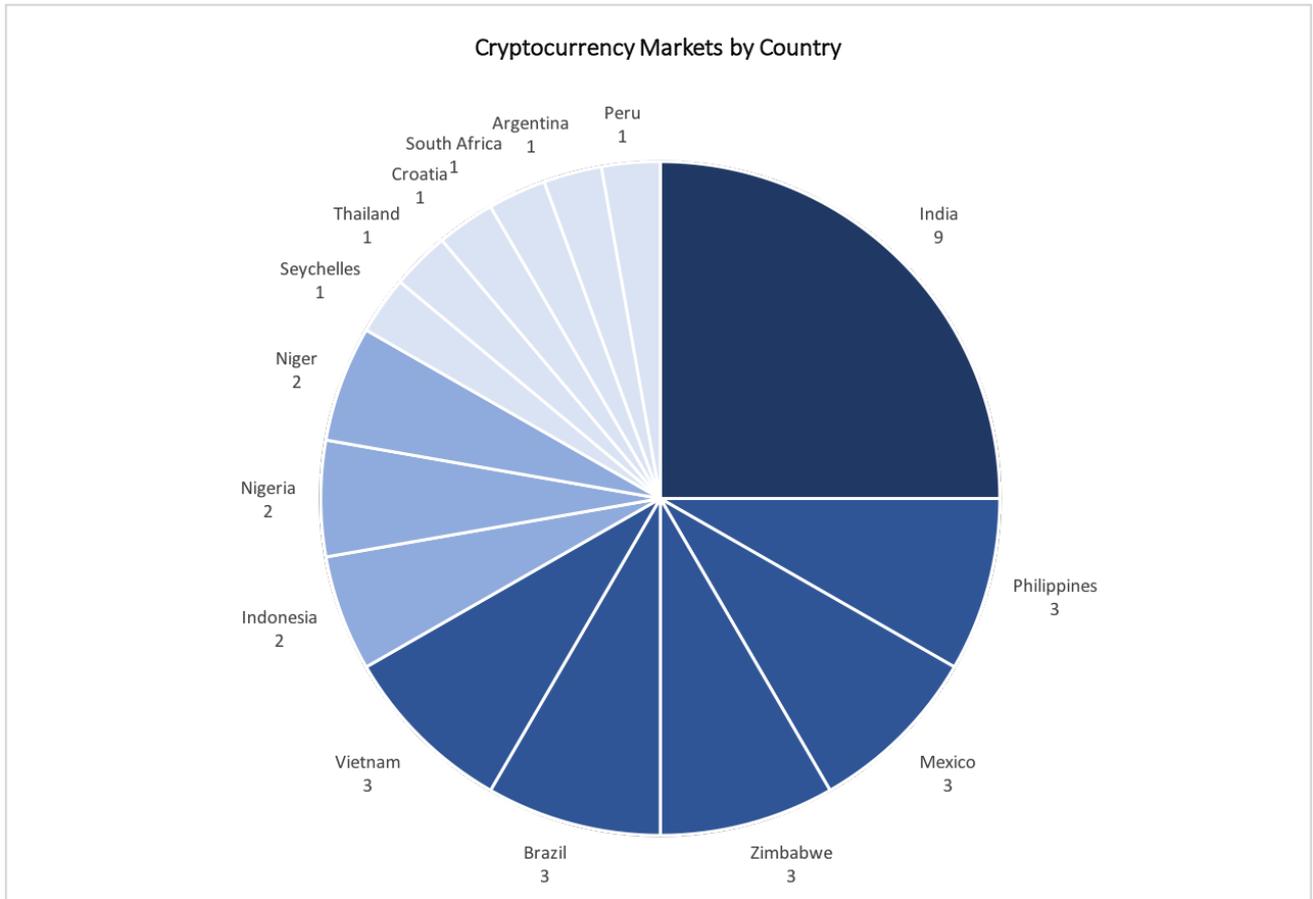

Figure 1: This figure shows how many crypto exchanges are registered in developing countries. India is tops in Asia, Zimbabwe leads the way for Africa, and Mexico and Brazil share the top spot in Latin America.

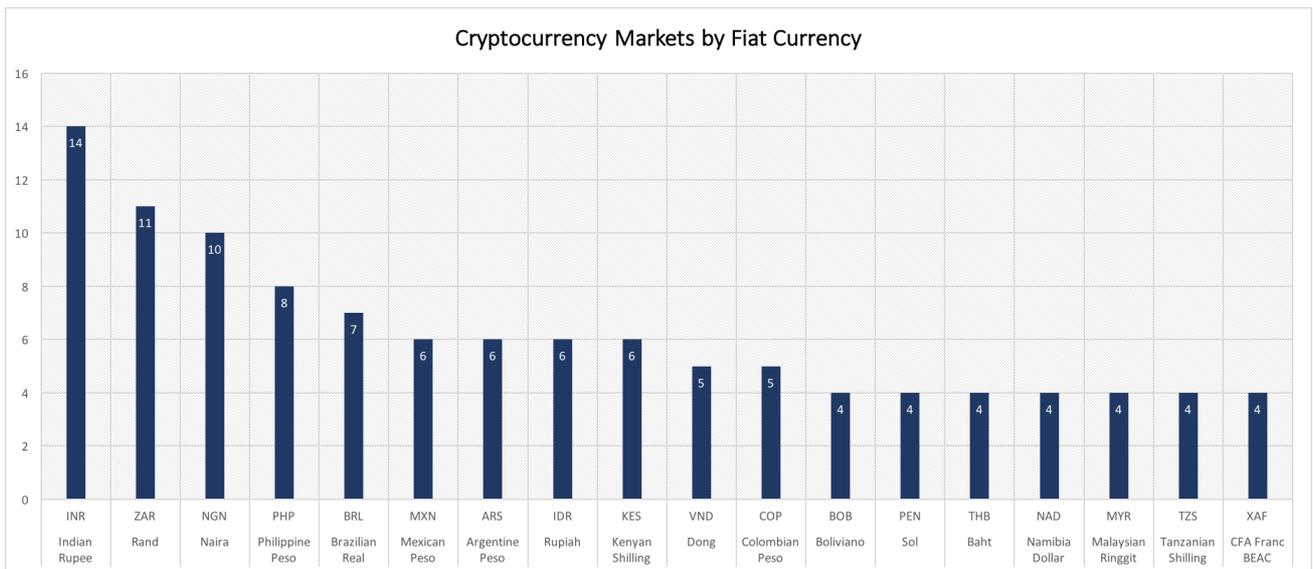

Figure 2: This figure shows how many exchanges trade given fiat currencies. Rupees lead the way, with 14 exchanges trading the Indian currency for cryptos.

# AlliedCrowds

The following table provides an 'at a glance' overview of the cryptocurrency exchanges in our database, and shows how active they are across select developing world currency markets.

## Bitbns

**Founded in 2017**

<https://bitbns.com>

Our founding members are young and enthusiastic adopters of crypto currencies, all of whom graduated from IIT. Before we started Bitbns, we have created multiple products that have helped consumers in commerce decision making. In late 2017, we decided to start a crypto-currency exchange. To give people a smooth entry into the world of crypto, we gave importance to ease of use, security, and customer support right from the beginning. Bitbns went live on December 14, 2017. In just a few months, our focus proved right.

## KoinOK

Founded in 2017

<https://www.koinok.com>

KoinOK at its core is a digit asset trading platform which facilitate users to buy and sell popular digital assets in an open order book system. KoinOK aims to provide a one-stop solution to trade cryptocurrencies in India in a quick, easy and secure manner. We have primarily focussed on solving issues related to security and support which seems to be the major concern with all the existing cryptocurrency exchanges in India and worldwide. We have built our own wallets and trading service from scratch and refrained from using any white label products in the entire platform to avoid any major security lapse. Beside this, we have done end-to-end data encryption, multi-signature key management system and two-factor authentication using google authenticator for preventing any unauthorized usage of the account. Our trading engine has been built over most efficient trading algorithms and is able to process thousands of transactions per second. We understand the criticality of the exchange downtimes especially with cryptocurrencies where the prices can change significantly in matter of few hours. Our backend architecture has been built as a combination of various internal services which can auto-scale independently to handle high load conditions and provide 24\*7 trading access without any downtime. Financial products which mostly deals with handling significant amount of money have to solve the most fundamental problem which is TRUST. Users should believe in the product and team that their money is safe on the platform. We have invested heavily in the platform security and support teams to provide users a peace of mind and focus on trading; leaving everything else to team KoinOK. To trade on the platform, users should register on the platform and complete the KYC process online by submitting the identity and address proofs. These systems have been put in place to ensure that the money used for transactions is trackable and adhering to the Anti-money laundering guidelines issued by RBI, India.

## Koinex

Founded in 2017

<https://koinex.in>

Koinex is India's most advanced digital assets exchange. It's the first complete exchange supporting multiple cryptocurrencies/tokens on a single platform. Built entirely from scratch, Koinex is aimed at bringing the magic of blockchain technology to India. Bitcoin - the world's first cryptocurrency - was introduced in 2009 and since then over 1000 tradable tokens have come into existence. However, for a long time India missed out on the tremendous opportunity that the rest of the world had been enjoying. And Koinex has been built to bridge that gap. Koinex has been built over cutting edge technology. Proprietary trading engine, wallet and platform architectures, grade A security, user-centric UI/UX, and tons of user-demanded features are some of the things which define Koinex. It's being carved to perfection, one day at a time, all with your constant love and support.

## LocalBitcoins.com

**Founded in 2012**

<https://localbitcoins.com>

LocalBitcoins.com is a person-to-person bitcoin trading site. At LocalBitcoins.com, people from different countries can exchange their local currency to bitcoins. The site allows users to post advertisements where they state exchange rate and payment methods for buying or selling bitcoins. You reply to these advertisements and agree to meet the person to buy bitcoins with cash, or trade directly with online banking. Bitcoins are placed in LocalBitcoins.com web wallet from where you can pay your bitcoin purchases directly.

## Luno

**Founded in 2013**

<https://www.luno.com>

We believe that decentralised digital currencies like Bitcoin and Ethereum will fundamentally change how the world views and uses money: cheaper, faster and safer transactions; more privacy and freedom; a significantly better user experience; and ultimately, more equality through giving everyone in the world access to the same financial system, no matter who they are or where they are from. Today we are one of the world's leading digital currency companies with a team of over 60 technology and finance experts, operating across several countries and continents. Our products and services make it safe and easy for people and businesses to store, buy, use and learn about digital currencies like Bitcoin and Ethereum. Our vision is to empower billions of people by bringing digital currencies like Bitcoin and Ethereum to everyone, everywhere.
